Dear Mr. Mako:

Re: Declaration of Exemption for Bulk Sampling in the Tintic District, DOE/023/019, DOE/023/020, DOE/023/021, DOE/023/022, Juab County, Utah

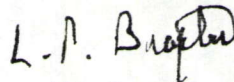

Based upon your letter regarding the DOE's in Juab County, Utah which Diamond Bullion filed November 13, 1985 with the Division and your request filed December 5, 1985 to have the four DOE's recognized as separate sites, the Division finds that while the proposed sites are in relatively close geographic proximity and the geologic conditions are similar (i.e. mine dumps resulting from abandoned precious metal mines), there is nothing to prevent the Division from recognizing each DOE request as a separate DOE. Therefore, the Division modifies its November 27, 1985 recognition letter to recognize the four DOE requests as separate DOE's. DOE/023/019 corresponds to the Centennial Eureka Mine Dump, DOE/023/020 corresponds to the Gemini-Stone Mine Dump, DOE/023/021 corresponds to the Eureka Hill Mine Dump, and DOE/023/022 corresponds to the Grand Central Mine Dump. If in the future any of these activities exceeds the limits of the DOE (500 tons per 12 consecutive months, or two acres of disturbed land for 12 consecutive month period) Diamond Bullion must notify the Division at least 90 days prior to such an expansion and incorporate in that notice a filing of an MR-1 form.

When a member of the Division staff is in the area the sites will be checked. If you have any questions regarding the above activities please refer to the appropriate DOE numbers for each of the above operations.

Sincerely,
